History AutoCAD has evolved from the March 1985 release of AutoCAD 1.1 by AutoDesk, which was the first program of its type, and in its long history has been offered in every major version of Windows. It was first released on MS-DOS 1.0, and first appeared on Windows 1.0. By the time of its first release, AutoDesk had already had several other successful programs, including PostScript drawing programs, a topological viewer, and a laser printer driver. The first version of AutoCAD was renamed from "AutoCAD Drafting System" to "AutoCAD" in September 1986. In 1989, the name AutoCAD was changed to AutoCAD 2.0, and in 1993 it was changed again to AutoCAD LT, to make AutoCAD available on a wider range of computers. The original DOS version of AutoCAD, first released in 1985, used a file format that was eventually replaced by a binary format in versions from version 6. The graphics and drawing engine was written by Jack Crenshaw. The ASCII text editor was written by Don Hopkins and Bruce Weisman. The first VB version was written by Steve Harris and Duane Stein. AutoCAD Draw was first released in January 1996. It supported the Open Document Format (ODF), a common standard for exchange of drawings and design data. In AutoCAD 2002, the name AutoCADDraw was changed to AutoCAD 2002. AutoCAD 2009 In December 2009, AutoDesk released a new version, AutoCAD 2009, the first version of AutoCAD for Microsoft Windows Vista and Microsoft Windows 7, and introduced a new numbering scheme starting at version 2009.5, although the most recent previous version was
